DO YOU KNOW==

Where Sioux City is located?

That Sioux City is in the midst of one of the great grain producing sections of this wonderfully fertile and diversified country?

That for this reason, and for the reason that Sioux City grain territory is in only a developing stage, the farmers in this territory are needing more live stock every year?

That Sioux City is a natural point from which farmers in this territory may draw the supplies of cattle and sheep for their feeding operations?

That Sioux City is showing a bigger percentage of increase in her live stock business than any of the leading primary market centers?

That there is no better live stock feeding section in the United States than is the section of which Sioux City is the center?

That Sioux City's cattle receipts for the first five months of 1915 increased 23 per cent over number at the same market for the like period of 1914?

That Sioux City's hog receipts for the first five months of 1915 increased 62 per cent over number received for the same period of 1914?

That Chicago's sheep receipts have fallen off 30 per cent this year to date compared with last year?

That Sioux City's per cent of decrease in sheep for this year to date is the same as that of Chicago?

That this spells a thirty per cent shortage in the mutton supply of the country?

That every flock of sheep in this country can be increased 30 per cent and the mutton supply will be short of normal needs?

That there has been an enormous slaughter of cattle since last fall that should have been in pastures and feed lots for the beef market of the coming fall and winter?

That Sioux City will want largely increased supplies of cattle this fall to meet demands of farmers in Sioux City territory?

That the farmer is learning to want to buy his feeders at the nearby market if possible?

That hog receipts at Sioux City for the year to date will pass the million mark this month?

That the local market shows an increase of 5,000 horses for the year, a gain of 100 per cent?

That Chicago has been closed to a stocker trade since last fall?

That Sioux City has passed the 200,000 mark in cattle this year?

That 62 per cent of these cattle have been fat cattle?

That 72,391 stock cattle were shipped from here during the first five months of the year, compared with 69,782 head the corresponding period in 1914?

That Nebraska purchased 4,000 fewer stock cattle at this market during that period compared with last year?

That Sioux City is getting more good ripe fat cattle than ever before and it is because Sioux City wants this kind and needs them?

That a pleased patron is the best ad, and Sioux City pleases its patrons?

That there will be an outlet from the Sioux City market for a half million sheep and lambs to go into feed lots in northwestern Iowa, South Dakota, southern Minnesota and northeastern Nebraska this fall?

That shippers of live stock from territory north and west of Norfolk, Nebraska, when using the Northwestern lines, via Norfolk, are 43 miles nearer to Sioux City than to their next nearest market?

That they are 507 miles nearer to Sioux City than to Chicago?

That special train service from Norfolk will be arranged for ten or more cars by giving sufficient notice?

That while one and two-car shipments arriving at Norfolk on regular stock trains at present are subject to some delay at that point, yet reach Sioux City at 6:25 a. m.—a splendid time to arrive for early market?

That the Burlington lines handle western cattle and sheep, destined to Sioux City, from their western territory in a most satisfactory manner?

That Sioux City's increase of 39,000 cattle for the year to date is more than half the net increase at the six leading primary markets for the same period?

That this market shows 62 per cent increase in hogs for the year to date while the increase at the six markets is only 18 per cent?

That a growing boy has the best appetite and that Sioux City is a growing market? Get that?—Sioux City Live Stock Record.
